T.V. SAIRAM'S MUSIC THERAPY - PG DIPLOMA
PROGRAMME**

PROSPECTUS

INDIAN MUSIC THERAPY ASSOCIATION (IMTA)

Indian Music Therapy Association (Estd. 2018) is the national-level accreditation agency for Professionals in Music Therapy, such as music therapists, music therapy trainers, consultants, and organizations like Coaching centers, Elderly homes, Govt. Prisons, Gyms, Hospitals, Medical institutions, Nursing homes, Rehabilitation Centers, Schools for Special children, Spas etc., which cater to Music Therapy in India. As its sister organization, Nada Centre for Music Therapy (2004-2026) had to be closed down recently due to certain operational issues, and the world-pioneering Distance Learning Programme also came to a halt.

To meet the growing demand for this popular programme, Indian Music Therapy Association is pleased to come forward and sponsor the 22nd Batch with effect from 1st July 2026. While Dr. T. V. Sairam, the author of this programme, will continue to serve as the Honorary Programme Director, Dr. C. Lalithambal has also volunteered to be the Honorary Faculty.

IMTA welcomes all those who are ready to face the academic challenges that Music Therapy offers. It may be recalled here that in the last two decades, over 1,000 students have successfully completed this programme and have found it relevant and useful.

OBJECTIVE OF THE PROGRAMME

To create awareness of music therapy concept and practices among the participant and to facilitate the therapist to hone up their skills.

SYLLABUS

The syllabus includes both theoretical inputs and creative practical assignments.

THEORETICAL INPUTS:

Subjects such as sound, acoustics, music, music therapy, biology, physiology, psychology, neurology, brainwaves, consciousness, nada yoga, raga chikitsa, recent medical research on music, world of music etc., are included not only in lessons (9 in number), but also in Supplementary Reading Materials and Assignments.

ASSIGNMENTS :

All the assignments aim at creatively finding the appropriate music, specific for non-musical issues viz., anger, anxiety, autism, depression, isolation, trauma etc., The programme includes a survey, a dissertation and also an internship.

COURSE FEE: INR 20,000

DISCLAIMER:

Music therapy concepts and practices revolve around emotions, due to which linguistic expression becomes highly limited. Music therapy is celebrated as a holistic medicine, rather than a stand alone intervention. As music therapy is yet to be recognized in India, at present job opportunities for those who have completed the programme are rather limited.
